# AI Consultant & Software Engineer

Versatile software developer with a strong focus on frontend development and a solid understanding of the full web stack. Proficient in modern web standards, web design, app design and user experience principles. Passionate about expanding my expertise into AI and always eager to learn new languages and architectures to tackle new challenges.

## Skills

- AI Strategy & Implementation
- AI Automation
- Agentic Workflows
- Openclaw
- Prompt Engineering
- MCPs
- Javascript
- HTML/CSS
- React.js
- Typescript
- React Native/Expo
- APIs
- Node.js
- UI/UX Design

## Experience

**AI CONSULTANT @ GENERAL SYSTEMS VENTURES – LOS ANGELES, CA / REMOTE – 11/2025-PRESENT**

- Provide AI strategy, implementation, and automation consulting to SMBs and enterprise clients
- Design and deploy agentic AI workflows, LLM integrations, and custom automation systems
- Advise clients on AI tooling selection, prompt engineering, and responsible deployment

**HUMAN DATA SPECIALIST / AI TRAINER @ XAI – PALO ALTO, CA / REMOTE – 8/2024–11/2025**

- **Data Labeling & Annotation:** Utilize proprietary software to accurately label and annotate data for NLP algorithm training projects.
- **Quality Assurance:** Ensure the delivery of high-quality, curated datasets to support model training, benchmarking, and overall advancement.
- **Collaboration with Technical Teams:** Work closely with technical staff to develop and implement cutting-edge AI initiatives and technologies.
- **Tool Improvement:** Assist in enhancing the design and efficiency of annotation tools through continuous feedback and collaboration.
- **Generative AI Development:** Engage in diverse writing assignments to refine and improve generative AI models.
- **Project Support:** Contribute to the training of new tasks by providing consistently high-quality data, aiding in the improvement of xAI's products and services.

**SOFTWARE ENGINEER @ LEAF GROUP – SANTA MONICA, CA – 11/2018–3/2023**

- Joined Leaf Group to work on Society6.com.
- Migrated legacy PHP pages to a new React codebase.
- Rebuilt and launched the S6 Artist Studio, enabling creators to design and sell their products.
- Developed the Design Details page, boosting sales by streamlining product discovery.
- Enhanced the internal CMS, allowing the marketing team to create and manage landing pages independently.
- Built additional features for the main React app used on the site.

**FRONTEND DEVELOPER @ IROKOTV – NEW YORK, NY – 03/2016–05/2018**

- Rebuilt iROKOtv.com's front-end using React.js from the ground up. Once live, we've saw an sharp increase in monthly subscribers and a marked drop in user complaints with the new design and optimizations.
- Collaborated with the product team to integrate A/B testing and new features, refining processes to enhance user experience.
- Worked with CTO on methods to decrease bandwidth use for streaming video.

**WEB DEVELOPER/DESIGNER @ DATADOG – NEW YORK, NY – 01/2015–03/2016**

- Led a complete website rebuild of DatadogHQ.com. Worked directly with the CEO and VP of Marketing to finalize the design.
- Developed tools for the marketing team to easily update the site.
- Post-launch responsibilities included developing new features, designing marketing assets, and ongoing site maintenance.

**TEACHING ASSISTANT @ NEW YORK CODE + DESIGN ACADEMY – NEW YORK, NY – 09/2014–01/2015**

- Supported students in learning HTML5, CSS3, JavaScript, jQuery, Ruby, Ruby on Rails, Database Theory, FTP, CLI, and Git.

**PHP DEVELOPER @ SBG MEDIA – BROOKLYN, NY – 05/2014–09/2014**

- Developed and maintained several websites with consistent desktop and mobile experiences using HTML, CSS, JavaScript, PHP, and MySQL.

**WEB DEVELOPER/DESIGNER @ NOOKA – NEW YORK, NY – 12/2013–05/2014**

- Upgraded and updated Nooka.com and built an additional outlet counterpart for the online store using the existing ZenCart inventory system.
- Translated the CEO's ideas into functional digital experiences using PHP, Wordpress, HTML, CSS, and Javascript.
