-

Experience

AI CONSULTANT @ GENERAL SYSTEMS VENTURES – LOS ANGELES, CA / REMOTE – 11/2025-PRESENT

- Provide AI strategy, implementation, and automation consulting to SMBs and enterprise clients
- Design and deploy agentic AI workflows, LLM integrations, and custom automation systems
- Advise clients on AI tooling selection, prompt engineering, and responsible deployment

HUMAN DATA SPECIALIST / AI TRAINER @ XAI – PALO ALTO, CA / REMOTE – 8/2024–11/2025

- **Data Labeling & Annotation:** Utilize proprietary software to accurately label and annotate data for NLP algorithm training projects.
- **Quality Assurance:** Ensure the delivery of high-quality, curated datasets to support model training, benchmarking, and overall advancement.
- **Collaboration with Technical Teams:** Work closely with technical staff to develop and implement cutting-edge AI initiatives and technologies.
- **Tool Improvement:** Assist in enhancing the design and efficiency of annotation tools through continuous feedback and collaboration.
- **Generative AI Development:** Engage in diverse writing assignments to refine and improve generative AI models.
- **Project Support:** Contribute to the training of new tasks by providing consistently high-quality data, aiding in the improvement of xAI's products and services.

SOFTWARE ENGINEER @ LEAF GROUP – SANTA MONICA, CA – 11/2018–3/2023

- Joined Leaf Group to work on [Society6.com](https://www.society6.com).
- Migrated legacy PHP pages to a new React codebase.
- Rebuilt and launched the S6 Artist Studio, enabling creators to design and sell their products.
- Developed the Design Details page, boosting sales by streamlining product discovery.
- Enhanced the internal CMS, allowing the marketing team to create and manage landing pages independently.
- Built additional features for the main React app used on the site.

FRONTEND DEVELOPER @ IROKOTV – NEW YORK, NY – 03/2016–05/2018

- Rebuilt [iROKOTV.com](https://www.iROKOTV.com)'s front-end using React.js from the ground up. Once live, we've saw an sharp increase in monthly subscribers and a marked drop in user complaints with the new design and optimizations.
- Collaborated with the product team to integrate A/B testing and new features, refining processes to enhance user experience.
- Worked with CTO on methods to decrease bandwidth use for streaming video.

WEB DEVELOPER/DESIGNER @ DATADOG – NEW YORK, NY – 01/2015–03/2016

- Led a complete website rebuild of DatadogHQ.com. Worked directly with the CEO and VP of Marketing to finalize the design.
- Developed tools for the marketing team to easily update the site.
- Post-launch responsibilities included developing new features, designing marketing assets, and ongoing site maintenance.

TEACHING ASSISTANT @ NEW YORK CODE + DESIGN ACADEMY – NEW YORK, NY – 09/2014–01/2015

- Supported students in learning HTML5, CSS3, JavaScript, jQuery, Ruby, Ruby on Rails, Database Theory, FTP, CLI, and Git.

PHP DEVELOPER @ SBG MEDIA – BROOKLYN, NY – 05/2014–09/2014

- Developed and maintained several websites with consistent desktop and mobile experiences using HTML, CSS, JavaScript, PHP, and MySQL.

WEB DEVELOPER/DESIGNER @ NOOKA – NEW YORK, NY – 12/2013–05/2014

- Upgraded and updated Nooka.com and built an additional outlet counterpart for the online store using the existing ZenCart inventory system.
- Translated the CEO's ideas into functional digital experiences using PHP, Wordpress, HTML, CSS, and Javascript.
